AFROJ

QA Engineer – Manual, Automation & API Testing

+91 9709925153 | mdafroj.3926@gmail.com | linkedin.com/in/afroj-2b694822b | github.com/Afroj736/Demo-project

Professional Summary

QA Engineer with **2 years** of experience in manual, API and automation testing across **healthcare (EMR/EHR, HL7)**, ERP billing and invoicing, e-commerce, appointment-booking platforms and marketing websites. Skilled in Java, Selenium WebDriver, TestNG, REST Assured, Postman, SQL and Jenkins CI/CD. Use AI tools (Claude, ChatGPT, Gemini, Cursor AI) to design automation frameworks, generate test scenarios and test cases, and speed up API test automation, with careful manual review. Delivered 60+ automated regression tests, 50+ validated API endpoints and 70+ pre-release defects.

Technical Skills

Test Automation: Java, Selenium WebDriver, TestNG, Maven, Page Object Model (POM), Data-Driven Testing, Playwright with TypeScript (working knowledge)

API Testing: REST Assured, Postman (collections, environments), Swagger, JSON Schema/Response Validation, Authentication (Token/JWT basics), Positive/Negative Scenarios

Manual Testing: Test Plan & Test Case Design, Requirement Analysis, Functional, Regression, Smoke, Sanity, Integration, End-to-End, UAT Support, Cross-Browser, Exploratory Testing

Database: SQL (joins, aggregates, backend data validation)

CI/CD & Tools: Jenkins (nightly builds, build triggers), Git/GitHub, JIRA, Agile/Scrum, SDLC, STLC, Defect Life Cycle, Bug Triage, RCA

AI-Assisted Testing: Claude, ChatGPT, Gemini, Cursor AI – framework design, test scenario and test case generation, REST Assured/Selenium code, debugging flaky tests, test data creation

Domains: Healthcare (EMR/EHR, HL7, patient records, clinical notes), ERP (billing & invoicing), E-commerce, Appointment Booking, IoT, Marketing Websites

Professional Experience

QA Software Tester – Blulabs IT Solutions Pvt. Ltd. **01/2025 – Present**
Mohali, India

- Tested healthcare, ERP and booking applications end to end: EMR/EHR and HL7 patient-record workflows, clinical note creation, billing and invoice calculations, and appointment scheduling.
- Automated 60+ regression test cases using Selenium WebDriver, Java and TestNG (POM), reducing manual regression effort.
- Built a REST Assured suite covering the complete user-onboarding API workflow, using AI-assisted generation with manual review and refactoring to follow POM and project standards.
- Integrated the automation suite with a Jenkins CI/CD pipeline for nightly builds and continuous regression execution.
- Validated REST APIs across 50+ endpoints using Postman and Swagger; checked status codes, payloads and negative scenarios.
- Performed backend SQL validation to confirm UI and API data matched the database, finding data inconsistencies and integration defects before release.
- Tested a backend OTP provider migration (email and SMS delivery) across EU and US regions to confirm no regression in authentication flows.
- Wrote test plans, test cases and traceability for new features; led bug triage and retesting with developers and product teams in Agile sprints.
- Identified and reported 70+ defects before production deployment, with clear steps, severity and evidence.

QA Software Tester – Levon Techno Pvt. Ltd. **11/2024 – 03/2025**
Bangalore, India

- Performed functional and regression testing on E-commerce and IoT applications, validating cart, checkout, payment and device-data workflows.
- Ran automated test suites through Jenkins pipelines to support continuous integration.
- Reported high-severity UI and backend defects in JIRA and verified fixes with developers before release.
- Carried out cross-browser and API testing with backend SQL verification.

Key Projects

End-to-End E-commerce Test Automation (Sauce Labs) – Java, Selenium, TestNG GitHub

- Built a modular end-to-end automation framework using Java, Selenium WebDriver, TestNG and Page Object Model

for scalability and maintainability.
- Automated the complete purchase journey: login, product search and selection, add to cart, checkout, payment details and order confirmation, with positive and negative scenarios (invalid login, empty cart, missing checkout fields).
- Used Maven for dependency and build management; configured Jenkins jobs to run on code commits and nightly builds.

Certifications

Software Testing Certification – SSquare IT Solution, Pune **07/2024 – 11/2024**

- **Manual Testing:** SDLC, STLC, Test Plan, Test Scenarios & Test Cases, Test Design Techniques (BVA, Equivalence Partitioning), Defect Life Cycle, Severity vs Priority, Smoke, Sanity & Regression Testing, Agile/Scrum, JIRA.
- **Automation & Tools:** Java (OOP), Selenium WebDriver, TestNG, Maven, Page Object Model, Jenkins, Git, Postman, REST Assured, SQL.

Education

Bachelor of Engineering (Aeronautical Engineering) – Anna University **2020 – 2024**
CGPA: 7.5
